

NSB

Native Slurry Backfill

- Trench backfill
- Retaining walls
- Road & Parking Areas
- Footing Extenders
- Erosion Control
- Haz. Soil Mitigation

PREDICTABLE AND PRECISE STRUCTURAL BACKFILL

- Uses native on-site materials mixed with cement and water to create high performance backfill material
- Viable replacement for costly aggregates and compacted soil
- Self-compacting & self leveling
- Dependable “Unconfined Compressive Strengths” (UCS)

Native Slurry Backfill (NSB)

Predictable High Performance Results

READY

Griffin is ready when you are. Our professional operators mobilize fast and efficiently to meet all your schedule needs. NSB is designed to meet all your technical project specifications and performance requirements.

SET

Placement is predictable, fast and easy. NSB is a high performance self-compacting, and self-leveling GREEN backfill material. Griffin provides all equipment, materials and experience necessary to make it happen.

GO

NSB builds strength fast. Required Unconfined Compressive Strengths (UCS) are easily achieved within a few hours to allow crews to continue work in the area. Save time and money by keeping you project on schedule.
